Collector's Library .0000000000The Casebook of Sherlock Holmes contains Conan Doyle's last twelve stories about his great fictional detective. Compared with earlier collections these tales are darker, exploring such themes as treachery, mutilation and the terrible consequences of infidelity, and containing such gothic touches as a blood-sucking vampire and crypts at midnight. With an Afterword by David Stuart Davies, a Fellow of the Royal Literary Fund, and an authority on Sherlock Holmes. He has written the Afterwords for all the Collector's Library Holmes volumes.

### THE CASE-BOOK OF SHERLOCK HOLMES

---

OUP Oxford In The Case-Book of Sherlock Holmes we read the last twelve stories Conan Doyle was to write about Holmes and Watson. They reflect the disillusioned world of the 1920s in which they were written, and he can be seen to take advantage of new, more open conventions in fiction. Suicide as a murder weapon and homosexual incest are some of the psychological tragedies whose consequences are unravelled by the mind of Holmes before the eyes of Watson. That said, the collection also includes some of the best turns of wit in the series, and indeed in the whole of English literature. The editor of this volume, W.W. Robson, is Emeritus David Masson, Professor of English Literature at the University of Edinburgh and the author of Modern English Literature. The general editor of the Oxford Sherlock Holmes, Owen Dudley Edwards, is Reader in History at the University of Edinburgh and author of The Quest for Sherlock Holmes. A Biographical Study of Sir Arthur Conan Doyle. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

PublicAffairs The era of the printed book is at a crossroad. E-readers are flooding the market, books are available to read on cell phones, and companies such as Google, Amazon, and Apple are competing to command near monopolistic positions as sellers and dispensers of digital information. Already, more books have been scanned and digitized than were housed in the great library in Alexandria. Is the printed book resilient enough to survive the digital revolution, or will it become obsolete? In this lasting collection of essays, Robert Darnton—an intellectual pioneer in the field of this history of the book—lends unique authority to the life, role, and legacy of the book in society.

### MAIGRET'S FIRST CASE

---

Penguin "One of the greatest writers of the twentieth century . . . Simenon was unequaled at making us look inside, though the ability was masked by his brilliance at absorbing us obsessively in his stories." —The Guardian When a Paris musician witnesses an altercation that may have been a murder, the young Inspector Maigret becomes embroiled in his first case A musician walking home along the Rue Chaptal in the early hours of the morning sees a panic-stricken woman call for help from an upstairs window; moments later he hears a gun shot. He tries to go to her assistance, pushing past the man who opens the door upon his frantic knocking, but he finds himself roughly ejected from the premises. Undeterred, he heads for the nearest police station and urges Maigret to return with him and find out what has taken place. With this look into the man he once was and how he became the insightful inspector we have come to know, Simenon offers new insights into the brilliance of Maigret.

## THE THIRD WAVE

---

---

### AN ENTREPRENEUR'S VISION OF THE FUTURE

---

Simon and Schuster The #1 New York Times and Wall Street Journal bestseller from Steve Case—the co-founder of AOL—presents “a compelling roadmap for the future...that can help us make sense of the technological changes reshaping our economy and the world. A fascinating read” (Sheryl Sandberg, Facebook COO and founder of LeanIn.org). Steve Case—a pioneer who made the Internet part of everyday life—was on the leading edge of a revolution in 1985 when he co-founded AOL, the first Internet company to go public and the most successful business of the 1990s. Back then Case was an entrepreneur in an industry that hadn't really been invented yet, but he had a sense how dramatically the Internet would transform business and society. In *The Third Wave*, he uses his insights garnered from nearly four decades of working as an innovator, investor, and businessman to argue the importance of entrepreneurship and to chart a path for future innovators. We are entering, as Case explains, the “Third Wave” of the Internet. The first wave saw AOL and other companies lay the foundation for consumers to connect to the Internet. The second wave saw companies like Google and Facebook build on top of the Internet to create search and social networking capabilities, while apps like Snapchat and Instagram leveraged the smartphone revolution. Now, Case argues, we're entering the Third Wave: a period in which entrepreneurs will vastly transform major “real world” sectors such as health, education, transportation, energy, and food—and in the process change the way we live our daily lives. Part memoir, part manifesto, and part playbook for the future, *The Third Wave* explains the ways in which newly emerging technology companies will have to rethink their relationships with customers, with competitors, and with governments; and offers advice for how entrepreneurs can make winning business decisions and strategies—and how all of us can make sense of this ever-changing digital age.

## PATIENT X

---

---

### THE CASE-BOOK OF RYUNOSUKE AKUTAGAWA

---

Faber & Faber Ryunosuke Akutagawa was one of Japan's great writers - author of the stories 'Rashomon' and 'In a Bamboo Grove', most famously - who lived through Japan's turbulent Taisho period of 1912 to 1926, including the devastating 1923 Earthquake, only to take his own life at the age of just thirty-five in 1927. These are the stories of Patient X in one of our iron castles. He will tell his tales to anyone with the ears and the time to listen - Inspired and informed by Akutagawa's stories, essays and letters, David Peace has fashioned a most extraordinary novel of tales. An intense, passionate, haunting paean to one writer, it also thrillingly explores the act and obsession of writing itself, and the role of the artist, both in public and private life, in times which darkly mirror our own.

Realistic case scenarios are used as a catalyst to introduce information and concepts that underpin practice. The presentation style supports the active participation of the student with the inclusion of questions at the beginning of each topic offering a platform to explore key areas whilst referring to the scenario. I highly recommend it to pre-registered student nurses." Kris Paget, Senior Lecturer, Faculty of Health, Social Work and Education, Kingston University, UK "This collection of case studies provides a unique and user friendly guide to commonly seen pharmacological therapies and treatment options across the lifespan. The case studies have been carefully selected to provide the diverse care needs of complex disease processes in a person centred way. Government Health Care Directives provide the essential clinical evidence based theory necessary to promote medicine adherence and each chapter provides the relevant pathophysiology which is essential to underpin the safe administration of medication therapies. The role of the nurse in medicine management with respect to patient education and the professional responsibilities of monitoring and evaluating complex medication therapies is presented in each case study. This provides an holistic approach to the care of patients receiving complex medication therapies." Barry Ricketts, Senior Lecturer, Adult Nursing, Oxford Brookes University, UK

## THE AGILE SAFETY CASE

---

Springer The safety case (SC) is one of the railway industry's most important deliverables for creating confidence in their systems. This is the first book on how to write an SC, based on the standard EN 50129:2003. Experience has shown that preparing and understanding an SC is difficult and time consuming, and as such the book provides insights that enhance the training for writing an SC. The book discusses both "regular" safety cases and agile safety cases, which avoid too much documentation, improve communication between the stakeholders, allow quicker approval of the system, and which are important in the light of rapidly changing technology. In addition, it discusses the necessity of frequently updating software due to market requirements, changes in requirements and increased cyber-security threats. After a general introduction to SCs and agile thinking in chapter 1, chapter 2 describes the majority of the roles that are relevant when developing railway-signaling systems. Next, chapter 3 provides information related to the assessment of signaling systems, to certifications based on IEC 61508 and to the authorization of signaling systems. Chapter 4 then explains how an agile safety plan satisfying the requirements given in EN 50126-1:1999 can be developed, while chapter 5 provides a brief introduction to safety case patterns and notations. Lastly, chapter 6 combines all this and describes how an (agile) SC can be developed and what it should include. To ensure that infrastructure managers, suppliers, consultants and others can take full advantage of the agile mindset, the book includes concrete examples and presents relevant agile practices. Although the scope of the book is limited to signaling systems, the basic foundations for (agile) SCs are clearly described so that they can also be applied in other cases.

Routledge Comparative case studies are an effective qualitative tool for researching the impact of policy and practice in various fields of social research, including education. Developed in response to the inadequacy of traditional case study approaches, comparative case studies are highly effective because of their ability to synthesize information across time and space. In Rethinking Case Study Research: A Comparative Approach, the authors describe, explain, and illustrate the horizontal, vertical, and transversal axes of comparative case studies in order to help readers develop their own comparative case study research designs. In six concise chapters, two experts employ geographically distinct case studies—from Tanzania to Guatemala to the U.S.—to show how this innovative approach applies to the operation of policy and practice across multiple social fields. With examples and activities from anthropology, development studies, and policy studies, this volume is written for researchers, especially graduate students, in the fields of education and the interpretive social sciences.

#### **THE BUSINESS CASE FOR LIFECYCLE THINKING**

---

Greenleaf Product Stewardship in Action describes how and why leading companies are taking responsibility for the environmental impact of their products and packaging. Product stewardship, often referred to as "extended producer responsibility" or EPR, is the idea that everyone that benefits commercially from a product, including manufacturers, distributors and retailers, has a shared responsibility to minimize its environmental impacts. Written primarily for a business audience, it draws on the knowledge and experience of industry practitioners and other experts to provide a structured approach to product responsibility within firms. This will help those new to the field, as well as more experienced practitioners, to develop an effective response to stakeholder concerns about the environmental impacts of their products and packaging. Unlike other resources on product stewardship and EPR, which tend to focus on the design or evaluation of public policy, this book highlights the business case for action. It argues that companies can achieve "shared value" - both public and commercial value - when they take a proactive and knowledge-based approach to the life-cycle management of their products. Product Stewardship in Action focuses on product stewardship as an effective business strategy rather than a philanthropic exercise. To be effective it needs to be based on a good understanding of product impacts and stakeholder concerns, and the risks and opportunities that these present to the business. The most effective responses will be those that address material issues in the product life-cycle while supporting the achievement of other corporate goals and priorities.
